1.1 Objectives of the PCI Hot-Plug Specification The primary objective of this specification is to enable higher availability of file and application servers by standardizing key aspects of the process of removing and installing PCI add-in cards while the system is running. Although these same principles can be applied to desktop and portable systems using PCI buses, the operations described ...

PCI Hot-Plug Specification - dr. ydkim

comprehends hot-plug in systems implementing conventional PCI and PCI-X 1.0 solutions. This specification needs to be extended to include the new speeds and modes introduced in the PCI-X 2.0 specification for an industry standard implementation of PCI-X 2.0 hot-plug.

Assuming the host supports hot-plugging and the PCI Express SLTCAP/SLTCTRL register (in spec: PCI Express Slot Capability Register, PCI Express Slot Control Register. There is a 1 and 2 for this as well -- enough bits to split across two regs). for that port was configured to indicate the port is hot-plug capable, the software can begin to enumerate the new device. The slot status (SLTSTA, PCI ...
