Creative Play Therapy Interventions for Children and Families By Liana Lowenstein, MSW, CPT-S When children are referred for therapy, they typically feel anxious and are

Creative Play Therapy Interventions for Children and Families

In psychology and ethology, play is a range of voluntary, intrinsically motivated activities done for recreational pleasure and enjoyment. Play is commonly associated with children and juvenile-level activities, but play occurs at any life stage, and among other higher-functioning animals as well, most notably mammals.

4 How Children Learn | How People Learn: Brain, Mind

Introduction. The most important development in early childhood social cognition is the development of theory of mind. 1,2 Its development during the first five years of life is described in this article, as well as factors that influence its development, and the consequences of its development for children's lives at home and school.
