UPDATE REPORT ON Teen Pregnancy Prevention - Best Start

In the United States, the proportion of pregnancies that were unintended increased slightly between 2001 and 2008 (from 48% to 51%), but, by 2011, it decreased to 45%. Following a long period of minimal change, the overall unintended pregnancy rate (the number of unintended pregnancies per 1,000 women aged 15–44) decreased substantially from 54 in 2008 to 45 in 2011, a decline of 18%.

Unintended Pregnancy in the United States | Guttmacher

Pregnant women who live with the threat of abuse and violence are more likely to be depressed, to use substances and are less likely to eat well (Martin et al, 1998), Many pregnant women do not report domestic abuse (Marquis & Butler, 2001).

THE IMPACT OF POVERTY ON PREGNANT WOMEN

memento of your pregnancy to be shared with your baby when they grow up. The calendar also contains useful information to help you have a healthy pregnancy. Now is a good time to think about what will happen when your baby is born. How you choose to feed your baby is a very important decision which can affect your child's health for years to come. If your baby could choose, they would want ...
