Learning to rank or machine-learned ranking (MLR) is the application of machine learning, typically supervised, semi-supervised or reinforcement learning, in the construction of ranking models for information retrieval systems. Training data consists of lists of items with some partial order specified between items in each list.

## **Learning to rank - Wikipedia**

Published as a conference paper at ICLR 2016 Many approaches in reinforcement learning make use of the recursive relationship known as the Bellman equation:
